

R&S Value to CILogon

- CILogon's Goal: Enable campus logon to cyberinfrastructure (CI)
- Our attribute release challenge:
 - CI used by researchers across many campuses
 - Example: DataONE users from 105 InCommon campuses. 17 of them released attributes to CILogon a year ago. Now 35 do. Not 105 yet...
- R&S provides a scalable approach to attribute release for SPs like CILogon ☺

User Experience

- User's federated logon needs to work the first time
 - Can't wait for IdP attribute release policy changes
 - R&S helps with this! ☺
- For now, CILogon continues to require self-service IdP test before IdP is listed
 - Tag R&S participating IdPs in metadata?
- Users can optionally request an IdP to be added
- CILogon also supports Google and ProtectNetwork

The image displays two screenshots of the CILogon Service web interface. The top screenshot shows the 'Test Your Organization's Identity Provider' page, which includes a 'Verify SAML Attribute Release Policy' section, a 'Summary' of attributes, and a 'Metadata Attributes' section. The bottom screenshot shows the 'Request A New Organization' page, which includes a 'Contact Information' section and an 'Additional Information (Optional)' section. Both pages feature the CILogon Service logo and navigation buttons.

Test Your Organization's Identity Provider

Verify SAML Attribute Release Policy

Thank you for your interest in the CILogon Service. This page allows the administrator of an Identity Provider (IdP) to verify that all necessary SAML attributes have been released to the CILogon Service Provider (SP). Below you will see the various attributes required by the CILogon Service and their values as released by your IdP. If all required attributes are present, you can add your IdP to the list of organizations available to the CILogon Service (assuming it has not already been added).

Summary

✓ All required attributes have been released by your IdP. For details of the various attributes utilized by the CILogon Service and their current values, see the sections below.

Add Your IdP to the CILogon Service

SAML Attributes

Identity Provider (entityID): urn:mace:incommon:uiuc.edu
ePTID:
ePPN: jbasney@illinois.edu
First Name (givenName): James
Last Name (sn): Basney
Display Name (displayName): James Alan Basney
Email Address (email): jbasney@illinois.edu
Level of Assurance (assurance):

Metadata Attributes

Organization Name: University of Illinois at Urbana-Champaign

Technical Contact: Mike Grady <m-grady@uiuc.edu>
Administrative Contact: Mike Grady <m-grady@uiuc.edu>

Request A New Organization

Add Your Home Organization To The CILogon Service

Thank you for your interest in the CILogon Service. The CILogon Service is a member of InCommon, a federation of over 200 educational institutions and professional organizations. However, before you can use the CILogon Service, your organization must partner with the CILogon Service so as to release particular user attributes.

If you are the administrator of an Identity Provider (IdP), you can view the [InCommon Participant Operational Practices](#) document for the CILogon Service and then [test your IdP](#) to verify you are releasing the required attributes. If all required attributes have been released by your organization, you can immediately make it available to users of the CILogon Service.

Otherwise, you can help us by letting us know that you are interested in using the CILogon Service. Please enter your contact information and select your organization below. We will contact the appropriate administrators in an effort to have your organization partner with our CILogon Service.
